♦♦  
FACILITY: EDT version V04-000

ABSTRACT:

This is the common require file for EDT. All modules must require this file.

ENVIRONMENT: EDT environment

AUTHOR: Bob Kushlis, CREATION DATE: 6-AUG-1979

MODIFIED BY:

- 1-001 Added REQUIRE for the translation from long external names to short ones, for the PDP-11 task builder. JBS 12-Feb-1981.
- 1-002 Changed external addressing mode to GENERAL. JBS 12-Feb-1981
- 1-003 Made PSECT declarations conform to modular programming standard, on VAX-11 only. JBS 12-Feb-1981
- 1-004 - Removed LIBRARY EDT, using the require file instead. Later we will convert back to a library file. JBS 27-Mar-1981
- 1-005 - Add EDT\$MOVE MEMORY. JBS 21-Apr-1981
- 1-006 - Change EDT\$MOVE MEMORY to EDT\$COPY MEM. JBS 22-Apr-1981
- 1-007 - Make EDT\$COPY MEM always a macro. JBS 22-Apr-1981
- 1-008 - Change E\$MOV to E MOV. JBS 05-May-1981
- 1-009 - Make EDT\$COPY MEM return a value. JBS 08-May-1981
- 1-010 - Change REQUIRE to LIBRARY. JBS 19-May-1982
- 1-011 - Add conditional compilation for some EDT features, so we can see how much address space they consume on the PDP-11. JBS 10-Feb-1983
- 1-012 - Move the conditional compilation stuff to a separate file. JBS 10-Feb-1983
