1-001 - Created. SBL 16-Aug-1982 1-002 - Put in conditional reference to STARLET since if LIB.L32 is being used, it contains all of STARLET. SBL 12-Jan-1983

Switches addressing modes to be used.

Switches addressing_mode (External=General, Nonexternal=word_relative);

Reference precompiled libraries. If SS$_NORMAL is defined then LIB.L32:
probably has already been referenced, so don't pull in STARLET.L32.
Modules which want to use LIB.L32 instead of STARLET.L32 should precede the REQUIRE of LIBPROLOG with a LIBRARY reference to LIB.L32.
