The working set limit was 1800 pages.
88811 bytes (174 pages) of virtual memory were used to buffer the intermediate code.
There were 70 pages of symbol table space allocated to hold 1272 non-local and 115 local symbols.
1165 source lines were read in Pass 1, producing 36 object records in Pass 2.
43 pages of virtual memory were used to define 42 macros.
