                              ! Image Synopsis !
                              +------------------+

Virtual memory allocated:           00000000 000069FF 00006A00 (27136. bytes, 53. pages)
Stack size:                                 0. pages
Image header virtual block limits:          1.          1. (    1. block)
Image binary virtual block limits:          2.         54. (   53. blocks)
Image name and identification:      CLUSTRLOA V04-000
Number of files:                            4.
Number of modules:                         21.
Number of program sections:                13.
Number of global symbols:                 357.
Number of cross references:               869.
Number of image sections:                   1.
Image type:                         SYSTEM.
Map format:                         FULL WITH CROSS REFERENCE in file _$255$DUA28:[SYSLOA.LIS]CLUSTRLOA.MAP;1
Estimated map length:               125. blocks
                              +----------------------+
                              ! Link Run Statistics !
                              +----------------------+

Performance Indicators              Page Faults   CPU Time       Elapsed Time
----------------------              -----------   --------       ------------
      Command processing:                  141   00:00:00.42    00:00:00.70
      Pass 1:                              183   00:00:03.55    00:00:18.11
      Allocation/Relocation:                42   00:00:00.27    00:00:01.04
      Pass 2:                               82   00:00:02.06    00:00:08.20
      Map data after object module synopsis: 16  00:00:02.59    00:00:03.59
      Symbol table output:                  21   00:00:00.26    00:00:04.82
Total run values:                          485   00:00:09.15    00:00:36.46

Using a working set limited to 1200 pages and 80 pages of data storage (excluding image)

Total number object records read (both passes):   1058
     of which 471 were in libraries and 34 were DEBUG data records containing 934 bytes

Number of modules extracted explicitly        = 17
     with 3 extrarted to resolve undefined symbols

14 library searches were for symbols nct in the library searched

A total of 21 global symbol table records was written
