General Description

UP-8354 Rev. 2

This Library Memo announces the release and availability of "SPERRY UNIVAC® 0776 Printer Subsystem General Description", UP-8354 Rev. 2.

This revision provides information on decreasing the print-band speed from the 1200 line-per-minute (lpm) printer, which uses a 48-character set, to a 1000-lpm printer, which uses a 64-character set.

Additional copies may be ordered by your local Sperry Univac representative.
